DORSINPLUS

# about us

---

## **About Us**

Dorsinplus is a leading company in the production and supply of cleaning products. With over 20 years of experience in the chemical industry, the company prides itself on using only the best and most effective raw materials to deliver high-quality and standardized products to its customers. Dorsinplus is committed to continuous innovation and updating its products, carefully analyzing customer needs to produce items with unique capabilities and features. We utilize advanced machinery and modern technologies to provide customers with the best high-quality products.

## **Cleaning Products**

Cleaning products are chemical compounds used to clean and remove fats, dirt, and impurities from various surfaces. Due to their specific formulations, these products can dissolve fat and dirt particles in water and separate them from surfaces.

## Types of Cleaning Products

### Multi-Purpose Washing Machine Gel

Washing machine gel is a powerful cleaner designed to clean and protect clothes during the washing process. Due to its special formulation, this gel can easily eliminate stains and dirt, soften clothes, and prevent damage to various fabrics.

## Dishwasher Liquid

Dishwasher liquid is a specialized cleaner designed to clean and eliminate grease and stains from dishes in the dishwasher.

## Descaler Liquid

Descalers are compounds that help remove deposits, dirt, and stains from various surfaces. These products are typically used to clean limescale and mineral deposits from surfaces such as tiles, ceramics, faucets, and pipes.

## **Drain Cleaner**

Drain cleaners are substances used to clear blockages and clogs in sewer pipes and plumbing. These products typically contain strong chemicals that help dissolve and break down clogging materials like grease and solid waste.

## Bleaching Liquid

Bleaching liquid is a chemical product used for cleaning and whitening various surfaces. This liquid contains strong compounds like sodium hypochlorite, which easily removes stains, microbes, and impurities.

## Dishwashing Liquid

Dishwashing liquid is a liquid cleaner used for washing dishes and removing grease and stains. Due to its surfactant components, this liquid can easily detach grease and dirt from the surface of the dishes, leaving them clean and shiny.

## Washing Powder

Washing powder is a detergent used to clean and remove stains and dirt from clothing. This powder includes various compounds such as surfactants, bleaching agents, and enzymes that aid in the washing process.

## **Types of Soaps**

### **Solid Soaps**

These types of soaps are among the oldest and most common and are usually used for washing hands and faces.

### **Liquid Soaps**

These soaps are suitable for hand and face washing and are typically available in wall-mounted pumps or pump bottles.
